Section to be completed BEFORE THE MOBILITY

I. PROPOSED MOBILITY PROGRAMME

Language of training: **English**.....

Overall objectives of the mobility:

This mobility will enable me to acquire new knowledge and establish new contacts and network in order to develop training activities in digital fabrication using the open-source platform TurtleStitch.

The goal is to consolidate expertise in creative coding, creative mathematics, and computer-guided textile production, and then transfer into my courses and workshops for students and teachers.

TurtleStitch is particularly designed to engage people of every age and gender in coding and creative mathematics: its block-based interface lowers the entry barrier for complete beginners, while the immediate, tangible stitching of a design onto fabric bridges the abstract world of algorithms with a familiar craft tradition. This combination of coding and textile production sparks curiosity, supports diverse learning styles, and makes computational thinking feel relevant and welcoming to all audiences.

Training activity to develop pedagogical and/or curriculum design skills:

Yes

Added value of the mobility (in the context of the modernization and internationalization strategies of the institutions involved):

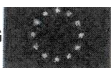

The creative coding combining old and new technology, in particular an embroidery computerized machine enriches STEM curricula while strengthening an international network.

Activities to be carried out:

Talk "Arachne and Techne"
Workshops on digital fabrication

Expected outcomes and impact (e.g. on the professional development of the staff member and on both institutions):

My intention is to integrate it into the Scienza della Formazione Primaria programme where I lecture in Geometry, as well as into continuing-education courses for teachers; and in third-mission initiatives like workshops for community

II. COMMITMENT OF THE THREE PARTIES

By signing⁷ this document, the staff member, the sending institution and the receiving institution/enterprise confirm that they approve the proposed mobility agreement.

The sending higher education institution supports the staff mobility as part of its modernization and internationalization strategy and will recognize it as a component in any evaluation or assessment of the staff member.

The staff member will share his/her experience, in particular its impact on his/her professional development and on the sending higher education institution, as a source of inspiration to others.

The staff member and the beneficiary institution commit to the requirements set out in the grant agreement signed between them.

The staff member and the receiving institution/enterprise will communicate to the sending institution any problems or changes regarding the proposed mobility programme or mobility period.

¹ Adaptations of this template:

- In case the mobility combines teaching and training activities, **the mobility agreement for teaching template** should be used and adjusted to fit both activity types.
- In the case of **mobility between Programme and Partner Countries**, this agreement must be always signed by the staff member, the Programme Country HEI as beneficiary and the Partner Country HEI as sending or receiving organization. In case of mobility from Partner Country HEIs to Programme Country enterprises the last box should be duplicated to include the signature of the Programme Country HEI (the beneficiary) and the receiving organization (four signatures in total).

² **Seniority:** Junior (approx. < 10 years of experience), Intermediate (approx. > 10 and < 20 years of experience) or Senior (approx. > 20 years of experience).

³ **Nationality:** Country to which the person belongs administratively and that issues the ID card and/or passport.
