

Turtlestitch 10 Fest

July 18-20, 2025

Happy birthday Turtlestitch! Ten years after Andrea Mayr presented the project with a masterclass in Amsterdam there are many reasons to celebrate. Turtlestitch won the hearts of children, artists and educators around the world. Part of the community has gathered at conferences celebrating roots Scratch and Snap! Celebrating a decade of Turtlestitch will give much more people the opportunity to join and share. The venue will be LocHal, Tilburg, The Netherlands. Right next to well connected Tilburg Centraal station the former workshops are ready to host the event. The public library offers rooms for both talks and workshops.

add a sentence or two on what's in it for the Dutch Code clubs and public libraries ... We're bringing a new hook for their ambition to educate society and children in the digital.

Participating artists and teachers

Workshops and talks

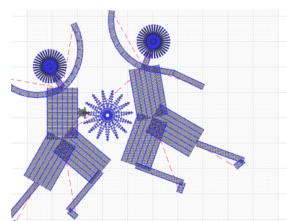

Turtlestitch has a very vibrant (and helpful!) global community, we're happy to announce that the following people have confirmed participation. We're especially proud that Cynthia Solomon, co-inventor of Logo, author of seminal article Two ways to think about a computer (1971) and co-author of recent follow up TurtleStitching will join us

Add something about the selection fo Trutlestitchers below. World class individuals who like to work with novices and experts
